

Yellow/black edge protection foam | FOAM ANGLE BUMPER

Reference : 36

Description :

Very easy to install, the foam adhesive corner shock absorber is an economical way of optimising personal safety and protection in work and living areas. The shock absorber is easy to attach using a double-sided adhesive. This foam corner protection makes it possible to pinpoint and secure all places where there is a risk of hitting your head: corners, edges, machinery and low head heights. - High density thanks to durable polyurethane foam

- Optimum impact resistance - no aking
- Yellow and black striped to indicate danger
- Dimension: L 1200 x Ø 40 mm/L 47.24 x Ø 1.57 Inch

Benefits :

- Adhesive foam corner shock absorber very easy to install
- Cost-effective way to optimize the safety and protection of people
- Attaching the shock absorber with a double-sided adhesive
- High density due to durable polyurethane foam
- Optimum impact resistance - does not crumble
- Yellow and black striped for danger signalling
