

Aluminium rail on gantry | Rail on portico

Reference : 534

Description :

Rail on portico with grooves on 4 sides. This aluminium frame is designed to allow easy organization of workshop signage, in particular to identify the location of components or other storage zones. The frame consists of 3 aluminium rails that are grooved on 4 sides. Two rails are 2000 mm/78.74 Inch high and the rail in between is 3000 mm long. - The aluminium pole and 2 baseplates with a diameter of 325 mm/12.79 Inch ensure a high level of rigidity and stability.

- The aluminium rails are grooved for fitting document holders, which you can customize yourself with the help of the holding bracket.
- PRODOC CASE and straps sold separately

Benefits :

- This 2000 mm high interior signage allows effective and visible identification from a distance.
- Robust, the aluminium portal rail is ideal for identifying storage, shipping or warehouse locations etc.
- This gantry is composed of 3 aluminium profiles grooved on 4 sides, to facilitate the installation of your signage.
- Compatible with interchangeable PRODOC ETUI PRODOCs, for quick location identification.
