## KANBAN time management stand | LEANFLASH GESTIME

*Reference : 638*

## Description :

The KANBAN time management stand |LEANFLASH GESTIME is used with SEQUENZ. Two normally separate functions into one :1 - Monitoring the operation with KANBAN card management2 - Planning an operation according to the time it takes (Take Time, minutes, hours, days).GESTIME is equipped with an extendable marker on a reel which is used for indicating milestones on a timescale. This time scale is shown by a magnetic label that you can customise yourself. A printed document, output from the SESA PRINT software or in Word format, represents each time scale and slips into the transparent protective strip. This magnetic label is laid out under the SEQUENZ according to the chosen length of the planning chart. GESTIME is laid out horizontally in multiples without limit in SEQUENZ systems. You can juxtapose GESTIME modules to visually follow a planning schedule, simply and with very easy implementation. Operators can then visually "manage their production" all on their own, integrating the constraints of the job environment (time, multiples references, etc.) - Use of colours or universal Kanban cards

## Benefits :

- Efficient and visual, this support allows you to combine planning management with time management: combine LEANFLASH SEQUENZ and LEANFLASH GESTIME for an optimal result.
- Easy to use, define a time scale and adjust the length of the marker according to the time required for a task.
- Keep an eye on your projects and production schedules!
- Compatible with universal or color Kanban cards.

## Technical specifications :

| Product Name | KANBAN time management stand | LEANFLASH GESTIME |
|---|---|
| SKU | 638 |
| Weight (kg) | 1.000000 |
