
ESD plastic storage bin | ESD STORAGE BIN*Reference : 14889*

Description :

The ESD trays are designed to store and transport electronic products. They protect the electronic modules from electrostatic discharges. Their resistance is such that electricity is discharged gradually so that the content is never exposed to excessive current.

Benefits :

- ESD anti-static tray in extremely resistant polypropylene
- Easy to identify due to the large label holder.
- The stackable tray is ideal for storage as well as holding your spare parts, screws and small accessories.
- Simple, rapid and easy to suspend from the rail for fastening plastic trays.
- Europe standard stackable container: an ideal product for storage and production
