

ESD storage bin | ESD PLASTIC TRAY

Reference : 14890

Description :

The ESD trays are designed to store and transport electronic products. They protect the electronic modules from electrostatic discharges. Their resistance is such that electricity is discharged gradually so that the content is never exposed to excessive current.

Benefits :

- Ideal for handling and transporting heavy loads.
- ESD anti-static plastic tray in highly resistant polypropylene
- Perfectly suited to industrial use
- Europe standard stackable container: an ideal product for storage and production
