

Ergonomic Anti-fatigue Matting | ANTI-FATIGUE MATTING ESD

Reference : 14908

Description :

The ESD anti-fatigue mat dissipates static and was specially designed to discharge electricity generated by the operator in order to avoid an unpleasant static shock whilst protecting the equipment. Anti-fatigue property Earthing through a male screw (10 mm) fastened to the mat. Actual resistance: $1 \times 10^9 - 1 \times 10^{10}$ Closed-cell virgin PVC foam Highly resistant surface Adapted to dry indoor environments

Benefits :

- Durable floor mat which protects operators from electrical charge build-up
- Ideal for any activity requiring a prolonged static position
- Reduces pressure on your body on a hard surface
- Rapid earthing through a male screw (10 mm) fastened to the mat

Technical specifications :

Product Name	Ergonomic Anti-fatigue Matting ANTI-FATIGUE MATTING ESD
SKU	14908
Weight (kg)	1.000000
Application	Lean Manufacturing, Industrie, Production, Atelier, Assemblage, Ergonomie
