

Post for a pedestrian barrier fixed to the ground | Pedestrian barrier

Reference : 15602

Description :

The pedestrian barrier allows workers and vehicles to occupy the same site safely, as well as sites where forklifts and pallet trucks regularly circulate... This strong pedestrian barrier is highly impact resistant. It is able to absorb impacts caused by heavy vehicles and guarantee pedestrian safety. The modular pedestrian barrier marks out each zone and can be supplemented at a later date. - Post H 1180 mm/46.45 Inch

- Fastening with attachments for fastening to a concrete floor
- For end post (code 160240), specify right or left orientation
- For 90° corner post (code 160242), contact us for the orientation of the caps
- Implementation plan to be provided by you

Benefits :

- Practical and modular, create your barrier according to your needs.
- Offer optimal protection thanks to their very resistant plastic construction.
- Effective in separating people and vehicles indoors or outdoors.
- The barrier absorbs the shock and returns to its original shape.
- Easy assembly.
