
Rail for pedestrian barrier axis to axis | Pedestrian barrier

Reference : 15603

Description :

The pedestrian barrier allows workers and vehicles to occupy the same site safely, as well as sites where forklifts and pallet trucks regularly circulate... This strong pedestrian barrier is highly impact resistant. It is able to absorb impacts caused by heavy vehicles and guarantee pedestrian safety. - Rail available in I 1000, 1500 mm

Benefits :

- Practical and modular, arrange the barriers as needed.
- Offers optimal protection thanks to its highly resistant plastic construction.
- Effective to separate people and vehicles both indoors and outdoors.
- The barrier absorbs the impact and returns to its original shape.
- Easy to assemble.
