

Shelving head protection | ARCHED SHELVING PROTECTION

Reference : 18560

Description :

Rack aisle protection is ideal for protecting pallet racks from collisions in high traffic handling areas. Designed in an arc, without corners and protrusions to avoid any risk of hooking and overturning the load of the trolleys. Made of polymer, the protection flexes and absorbs the impact then returns to its original appearance. No replacement or repair is therefore necessary after a collision. - Colours: yellow

- Size: H 550 mm
- Fixing by anchors for fixing to the concrete floor included

Benefits :

- Quick installation and assembly.
- Extremely impact resistant.
- Keeping their shape, appearance and characteristics after collision.
