Intuitive digital paperboard | E-PAPERBOARD A

Reference : 14820

Description :

The digital update of traditional whiteboards, the E-PAPERBOARD marks the start of a new era of collaborative working within companies. Ergonomic and very easy to use, they are the essential new tool for encouraging creativity and sharing information. Offering exceptional mobility thanks to its roller stand, the E-PAPERBOARD also transforms any space into a meeting room.The E-PAPERBOARD allows you to create, present, annotate, share or even move documents easily.Its intuitive, user-friendly interface ensures immediate ease of use, allowing optimum productivity. The onboard technology reproduces the sensation of writing on paper without the restriction of a specic stylet: any pen or marker to hand works. Content can be deleted just as easily by simply wiping your palm across the area to be deleted. Unlike conventional paperboards, the E-PAPERBOARD makes it possible to roll out the equivalent of 20 pages of writing per document, and a simple scroll on the side can be used to go to a specic place.For more information about this product, download our catalogue dedicated to Industry 4.0 or visit our ACADEMY.
