
Anti-return buffer

Reference : 18622

Description :

Its function is to prevent boxes or containers returning backwards on dynamic stockpile tracks by means of Roller Tracks. By means of a pendulum action, its normal situation is that of braking. The flap is only folded in one direction, allowing the goods to pass through. Once it has passed the point on the wing, the wing returns to its normal vertical position. - Fixing on roller rail for LEANDYNAMIC

- Made of plastic with \varnothing 3 mm steel axle

Benefits :

- Avoid returning merchandise
- Suitable for situations in which a reversal of the goods should not be possible
- Easily fits into roller tracks

Technical specifications :

Product Name	Anti-return buffer
SKU	18622
Weight (kg)	1.000000
Application	Rayonnage dynamique, Accessoires rayonnage dynamique
