Modular acoustic workshop partition for communication space | ESPACE'INFO ACOUSTIC
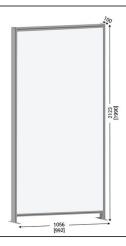

Reference : 18624

Description :

Modular acoustic workshop partition for communication space | ESPACE'INFO ACOUSTIC very stylish, aesthetic, flexible, modular, quick and easy to assemble for "life-size" visibility. A clever system with all the magnetic accessories will allow you to personalize your project at the best cost. - Modular panels in satin anodized grooved aluminum profile

- Rapid assembly of several panels using flexible connection profiles

- Painted white sheet metal background for magnetic display

- High performance acoustic insulation

- Customizable stretched fabric

 Sound insulation is provided by polyethylene foam.This material effectively absorbs noise in demanding environments, particularly in humid environments, without changes in its performance. This makes it a unique alternative to the materials usually used in sound absorption, with many advantages:- Sound absorber

- Recyclable

- Light

- Non-fibrous

- Resistant to humidity and fire

- Reinforced structure

 The stretched canvas face will provide you with an Eco-Responsible solution.Sublimation is an ecological and sustainable printing process whose inks are made from water. The supports are made from uncoated polyester and are recyclable.- Textile customizable (color and logo) and interchangeable at will.

- Fire classification M1

Benefits :

- A modular acoustic workshop partition allowing you to create communication spaces easily and without work!

- Rapid assembly of several panels using flexible connection profiles

- Simple study of your project by layout diagram and validated by our design office

- A customizable (color and logo) and interchangeable stretched fabric side

Technical specifications :

Product Name	Modular acoustic workshop partition for communication space | ESPACE'INFO ACOUSTIC
SKU	18624
Weight (kg)	1.000000
Application	Management Visuel, Atelier, Communication, Information, Affichage, Documentation
