

Electric handling trolley | LEANPOST 2200

Reference : 18646

Description :

The electric handling trolley |LEANPOST 2200 brings great comfort to the operator's work. It is a LEAN tool to facilitate the movement of 600 x 400 mm format bins. Handling the bins is made easier thanks to the electrical height adjustments, allowing all the boxes to be placed at the right level. The LEANPOST 2200 allows effortless sliding (instead of carrying the container) to improve working conditions and QVT (Quality of Life at Work). The operator's spine is less stressed and the risk of musculoskeletal disorders is reduced. Our research and development department is at your disposal to assist you with all your projects. - Easy and quick adjustment thanks to its remote control fixed under the top. Possibility of memorizing 4 positions

- Ground support on 4 height-adjustable glides
- Two electrical columns, 120/230 Volt power supply
- Allowable overall load: 100 kg for a capacity of 4 or 6 bins 600 x 400 mm depending on the model

Benefits :

- Brings great comfort to the operator's work.
- The grooved anodized aluminum structure is an additional asset for attaching accessories (shelves, shelves, file supports, handling handle, etc.).
- The electric height adjustment of the station facilitates the handling of the bins.
- Several lengths are available.
