

Electrical industrial workstation | QUALIPOST 620B ERGO

Reference : 1

Description :

Electric workshop workstation - Ergonomics and performance at the service of your workshops. Optimize the working conditions in your workshops with our height-adjustable electric workstation. Designed to improve posture and reduce musculoskeletal disorders (MSDs), the QUALIPOST 620B ERGO is an ideal solution for combining comfort and practicality. Main features:- Precise electric adjustment: Easily adjust the height of the worktop from 607 mm to 1252 mm using the remote control attached under the top to adapt to each user. Possibility of memorizing 4 positions with height display.

- Maximum load: Capable of supporting up to 100 kg.
- Robust top: 28 mm thick gray laminate worktop, resistant to shocks and wear.
- Adjustable glides: Ensure perfect stability on all types of floors, even uneven surfaces.
- Customizable options: Many accessories from the WORKSHOP FURNITURE range are compatible. Add a back panel, drawers, shelves or tool holders according to your needs.

User benefits:- Optimal comfort: The operator can easily adjust the height to work sitting or standing.

- Improved health: Significant reduction in MSDs thanks to adapted ergonomic positions.
- Increased productivity: A comfortable posture allows you to maintain concentration for longer.
- Durability: Made with robust materials for intensive use in an industrial environment.
