LOGISTICS

A new and original idea to form, view and level production. The operator will progressively slide the cards into the boxes according to:

- time slots
- different colour thresholds (green, yellow, red)
- different parts.

These markings are configured by descriptions printed on the label and slide into a magnetic holder (several examples of descriptions are provided).

- Provided with a 16 -box capacity and 1 magnetic label H 40 mm/H 1.57 Inch
