CUSTOMISATION OF MODULAR BANNERS

Custom banners

Our range of custom banners is 100% customisable for long-lasting signs in your preferred style. Customise your banners by choosing the background colour, text, logo, etc.

Banner installation

Wall, stand, magnetic or adhesive versions: choose your preferred option from our overhead sign range. All our banners can be delivered according to your preferences (depending on model): without fasteners, with fastening brackets or fastening chains.

1. Print the text

Using Word, Excel or any other text editor, print the banner wording on A4 sheets of paper. Pre-defined templates are available in our SESA PRINT tool.

2. Place the A4 sheets on the blank banner

Slide the sheets into the banner's upper and lower slots. The wording is easily interchangeable so you can update your visual signs in just a few minutes.

3. Insert the protective film

Reposition the transparent protective film to hold and protect your sign.

INDICATION, MARKING, SAFETY

CUSTOMIZABLE LIGHT-UP CURVED HEADBAND

NEW

Customizable

The customizable curved light strip with LED backlighting allows you to identify a work area even at night and on less bright days. The oval shape of the strip is optimally designed for LED lighting.

You can use the Andon method to standardize your workshop, signaling problems or breakdowns with a change in color, such as turning the banner red to indicate an incident.

- 19 modes in total, adjustable speed and intensity
- 20 fixed colors
- Approximately 15 meters of potted material for using the remote control
- 12 Volt RGB LED strip
- Connected to the mains with a 1500 mm L cable
- *Text to be specified when ordering*
- BAT validation period in addition
