

# ESPACE'INFO ACOUSTIC

## Modular acoustic workshop partition for communication space

ESPACE'INFO ACOUSTIC is a highly stylish, flexible, modular, quick and easy to assemble **acoustic workshop partition for communication areas**, providing 'life-size' visibility.

An ingenious system with all the magnetic accessories you need to customise your project at the lowest possible cost.

Our recent workshop tests demonstrate the exceptional effectiveness of our acoustic panels in reducing noise, guaranteeing optimum sound comfort in a variety of environments.

We have observed significant noise reductions:

Up to 26% for a portable screwdriver, 14% for an aluminium saw bench, 14.5% for a 2400 W industrial Hoover, 10% for an industrial compressor and 20% for a simple mobile phone ringtone.

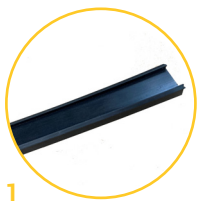

These gains are substantial, since every 10 dB increase makes the sound twice as loud for the human ear. Our panels considerably reduce noise pollution, providing a quieter, more pleasant environment, while improving productivity and well-being.

- Modular panels in grooved satin anodised aluminium profile
- Several panels can be assembled quickly using flexible connecting profiles
- Varnished white sheet metal back for magnetic display
- High-performance acoustic insulation
- Moisture and fire resistant
- Customisable stretch fabric (colour and logo\*) *\*subject to approval*

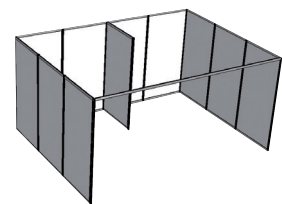

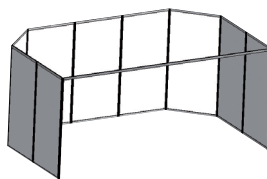

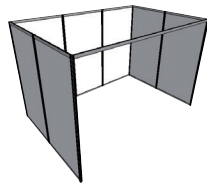

Soundproofing is provided by the technical components.

Our materials effectively absorb noise in demanding environments.

### Accessories

### Examples of possible configurations

CODE	DESIGNATION	LEAD	PACKING
118160	W 1056 x H 2123 mm/41.57 x H 83.58 inch one varnished white sheet metal side for the magnetic display and one gray stretched fabric side	15 days	Premounted
1	118272 Rubber connection profile L 2114 mm/83.23 inch	5 days	Per unit
2	143100 Technical costs for new screen printing model	15 days	Assembled
2	147099 Customization of the fabric for ESPACE'INFO ACOUSTIC (color and logo) W 992 x H 992 mm/39.06 x H 78.35 inch	15 days	Per unit
